Quarterly Special valid from July 1st – September 30th, 2022

Food and Beverage Marking and Labelling An industry with high requirements

Marking material specially made for the Food and Beverage industry. The food and beverage industry places high demands on all components and materials used in the production process - this also applies to marking. Particular attention is paid to the following aspects.

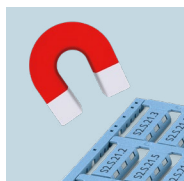

Resistant:

High chemical resistance and optimum adhesion

Identifiable:

Blue and Yellow marking available

Detectable:

Marking material is detectable thanks to metal particles incorporated

- Hygienic design with stainless steel knurling and washdown design with plastic knurling
- Material resistance of cabling for the food industry

Features and benefits

- ✓ Easy to clean thanks, to the special hygienic design, IP69K
- ✓ Corrosion protection for all exposed metal parts, stainless steel
- ✓ Designed to meet the requirements of the pharmaceutical and food industry
- ✓ UL approved
- ✓ Cable jacket made of PVC rated from -25C to 90C

QUINT4 — CAP

The maintenance free solution

For UPS solutions without the need to replace battery cells, the QUINT4-CAP buffer modules offer a maintenance free solution for short duration back up of up to 30s nominal current. A back-up in the form of capacitor-based solution helps to compensate for voltage fluctuations, prevent failures and allows for safe shutdown of systems.

PLC-V8 Adapters

For easy coupling to digital IO Cards

The system cabling allows fast and error free connection of eight relay channels to the control level. This solution combines the product features of the PLC-INTERFACE and VARIOFACE system cabling relay family.
